

Lehi Tabernacle

By Carl Mellor

1900-1910-The Lehi Tabernacle was Constructed. The building's architect was Richard Kletting, who also designed the Utah State Capitol. Ten years in the making the building project faltered many times for lack of financial support.

In 1905, the Church President Joseph F. Smith was asked for a donation of \$4,000. The Church concurred.

Main seating in the tabernacle was 698 opera chairs with the meeting capacity of 1,200 included in the vestry and balcony. Twelve hundred ninety-one persons attended the dedication services on 15 May 1910. The building was dedicated by Church president Joseph F. Smith.
